

# 114 Optical Cable Price

## Article Overview

The price of 114 optical cables varies widely, typically ranging from \$0.09 to \$6 per foot depending on type, fiber count, and installation requirements.

### Pricing Overview

For fiber optic cable materials only, wholesale bulk purchases can cost \$0.09 to \$1.52 per foot, while retail prices range from \$1 to \$6 per foot, depending on fiber strand count, cable construction, and application type . For example:

- A 1-core FTTH drop cable costs around \$0.13 per foot.
- A 288-count optical fiber backbone cable can reach \$6 per foot or more.
- Single-mode fiber typically costs \$0.10 to \$0.50 per foot, while multimode fiber ranges from \$0.30 to \$1.00 per foot .

### Factors Affecting Price

- Fiber Type and Count: Higher strand counts increase cost proportionally.
- Cable Construction: Indoor riser-rated cables are cheaper than plenum-rated or armored cables, which can range from \$0.50 to \$5 per foot for harsh environments or direct burial .
- Installation Method: Underground or complex installations increase overall project costs compared to aerial or indoor runs.
- Pre-terminated Assemblies: Factory-terminated cables and patch cables cost more due to connectors and labor .

### Retail Options...
