

8-core outdoor single-mode fiber optic model

Article Overview

Popular 8-core outdoor single-mode fiber optic cables include FIBERHOME GYXTW-8B1.3, GYTZA-8B1.3, and GYTS-8B1.3, designed for aerial, duct, and direct burial installations with robust environmental protection.

Key Features

FIBERHOME GYXTW-8B1.3

- Contains 8 single-mode fibers in a stranded loose tube design for minimal bending loss and stress protection .
- Equipped with a galvanized steel wire messenger for tensile strength, suitable for aerial installations.
- UV-resistant and water-blocked, ensuring durability in harsh outdoor environments.
- Ideal for FTTH, metropolitan area networks (MAN), and long-distance telecom applications.
- Supplied in multiples of 100 meters, allowing flexible project management .

FIBERHOME GYTZA-8B1.3

- Features 8 single-mode fibers in a water-blocked loose tube for moisture protection .
- UV-resistant outer jacket protects against weather, mechanical impact, and temperature fluctuations.
- Suitable for aerial, duct, or direct burial installation, supporting voice, video, and high-speed internet services....
