

ABS cable tray installation price

Article Overview

ABS cable tray installation typically ranges from \$10 to \$50 per meter, depending on material, tray type, size, and installation complexity.

Material Costs

ABS trays are a type of plastic tray, generally more affordable than metal trays but less suitable for heavy loads or high-temperature environments. Plastic trays, including ABS, usually fall in the \$10-\$25 per meter range for standard sizes, while custom or coated trays may cost more. Compared to steel (\$5-\$25/m) and aluminum (\$6-\$30/m), ABS is competitive for light to medium-duty installations.

Labor and Installation Costs

Installation costs can equal or exceed material costs, depending on project complexity. Key factors include:

- Installation height: Elevated or hard-to-reach areas increase labor requirements.
- Routing complexity: Multiple bends, intersections, or conflicts with other systems raise costs.
- Support spacing and tray size: Larger trays require stronger supports and more installers.
- Environmental conditions: Outdoor or corrosive environments may require additional protective measures. For typical indoor installations, labor may add \$10-\$25 per meter, while complex industrial or outdoor projects can push total installation costs to \$40-\$50 per meter or more
