

Brand of construction site electrical distribution box

Article Overview

Common brands for construction site electrical distribution boxes include Elektra, BOSECKER, ENERGYBOX, Wieland, and Gewiss.

Construction site electrical distribution boxes are manufactured by several specialized companies, each offering different designs and materials. Elektra provides robust plastic housing with integrated strain relief clamps and accessible fuse covers for safe and efficient connections . BOSECKER produces sheet steel and thermoplastic enclosures compliant with IEC 61439 and IEC 60364 standards, suitable for medium appliances and pre-wired setups . ENERGYBOX offers pre-wired technopolymer boards that are portable and reusable for temporary installations . Wieland focuses on pluggable, decentralized distribution boxes for both power and signal applications, designed for harsh environments . Gewiss manufactures thermoplastic ACS boards with high impact and weather resistance, available in mobile and pre-wired versions for primary and secondary distribution . These brands differ in materials (plastic, thermoplastic, sheet steel), IP ratings, portability, and suitability for temporary or permanent installations. Choosing the right brand depends on site requirements, load capacity, and environmental conditions.
