

British AMR Equipment Manufacturer

Overview

Leading technology company Siemens has partnered with Expert Technologies Group and RMGroup to manufacture the UK's first fully customisable autonomous mobile robots. What is an AMR?

An autonomous mobile robot (AMR) can be described as a vehicle or device capable of navigating an uncontrolled environment without the need for electro-mechanical, physical guidance devices or human operational control. By leveraging cutting-edge, tailored solutions, we help businesses fully optimize their processes, increase. With AMRs, you can connect and easily scale up production lines, ensure just-in-time delivery or pick-up of materials, reduce health and safety risks on the warehouse and manufacturing floors, as well as improve the quality and traceability of products. The robots are equipped with sensors and. Reeco is the official UK solution partner for market-leading Omron Mobile Robots. Using scanners and sensors, they map their surroundings and plan optimal routes. This is a list of what we believe to be every manufacturer of mobile robots for material handling and intralogistics in warehouses and factories.
