

Cable tray integration

Overview

The main cable tray connection methods include splice plates, bolted connections, quick connect systems, fish plates, clamps, and welding. Each runs from the main cable tray system to electrical devices or other equipment. Choosing the right one depends on project conditions, load. With our cable trays with integrated ends, Trayco® is constantly looking for solutions that increase our customers' competitiveness due to their capacity, light weight (L) or ease of assembly. The unique shape of our cable trays results in up to 50% extra capacity in specific applications compared. The Wire Basket Overhead Cable Tray Routing System is a robust cable management solution that optimizes system reliability, space utilization and scalability. The wire basket is up to. With the RS 60 cable tray installation system, we offer you the last installation type of the standard support construction, so that you can implement all installations required in the building project with circuit integrity maintenance on the basis of the standard support construction.
