

Can a returned fiber optic router still be used

Overview

In most cases, yes, you can use your existing router with fiber optic internet, provided it has a WAN (Wide Area Network) Ethernet port and your ISP provides a modem/ONT with an Ethernet output. If you are currently using a combined modem-router for a DSL service (for example), and you are switching to a new ISP. How to recycle your BT router In 2020, over a million pieces of equipment were returned to BT. They successfully refurbished half a million of these to help prevent 170 tonnes of electrical waste from going to landfill. In this guide, we'll explain router compatibility, setup steps and whether upgrading your router is necessary to maximize fiber speeds. So, if you have one kicking around the place, here are several uses for an old router. What if your Wi-Fi network doesn't extend across the full range of your home?

Although you can opt for powerline Ethernet adapters. When you sign up with Briant Broadband you'll not be able to use your old router as ours run on fibre optic data rather than electronic signals down a copper wire.
