

Connection method for an 8-port industrial network managed switch

Overview

Eight auto-negotiating 10/100/1000 Mbps ports send data via Cat5e/6/6a cable only to the devices designated to receive it, which improves the efficiency and potential throughput of the network. The Comnet CNGE8MS is an 8-port managed Ethernet switch built to deliver reliable performance in harsh and environmentally challenging applications. It provides four 1000BASE-TX ports and four gigabit combo ports, configurable for 10/100/1000 Mbps over Cat5/6 copper or over multimode or singlemode. The Sixnet® 8-port Managed Industrial Ethernet Switch enables fast Ethernet connectivity for industrial equipment in extreme industrial settings. Rugged and high-performing with a range of advanced control, monitoring and security features deployable through a web browser. 8-Port Unmanaged Industrial Gigabit Et. It provides eight 10/100/1000BASE-T copper ports delivered in an IP30 rugged strong case with redundant power system.
