

Construction of Data Center Racks in the Netherlands

Article Overview

Data center rack construction in the Netherlands involves custom-designed racks, advanced cooling solutions, and a growing market with nearly 338,000 racks projected by 2030.

Overview of Rack Construction

Data center racks in the Netherlands are designed to meet high reliability and performance standards, accommodating servers, networking equipment, and storage systems. Companies like All-Rack specialize in custom solutions, offering modular racks, cold aisle and hot aisle containment systems, and tailored designs for limited space or complex infrastructure requirements. These solutions optimize airflow, improve cooling efficiency, and reduce energy costs, with hot aisle containment improving efficiency by up to 40%.

Key Suppliers and Solutions

- All-Rack: Provides custom racks, raised floors, cabling, climate control, UPS, and emergency power units. They also offer installation services, including building cages, linking racks, and installing bus bars.
- Schneider Electric Netherlands: Offers a wide range of open and enclosed server racks, including APC NetShelter SX, soundproof racks, wall-mount enclosures, and custom rack PDUs suitable for data centers, server rooms, and industrial applications.
