

Construction site power distribution box cable specifications and models

Overview

Various cable types, cross sections, and lengths as well as other components, such as distribution blocks, can be used. The distribution boxes are constructed according to IEC 61439. Various installation connector systems are used for the inputs/outputs, in accordance. Transformer box T42-11 Power supply by 5 mtr cable H07RN-F 2x1mm² with vulcanized schuko male plug 230V 16A 2P+E Voltage transformer (ring type) 230V -42V, 120VA Internal thermal protection. BLOCK Series distribution assemblies are made of thermoplastiqc material. Designed by BAHRA, the Load Centers (LC) use the best selection of materials, cutting edge technology and class leading features to ensure safety, durability and performance. The remarkable Load Center designs are a result of an extensive effort from a team of some of the best industrial designers. Construction power cable is widely used in building electrical systems, infrastructure projects, industrial construction, commercial facilities, underground distribution networks and utility power supply systems. In conformance to the IEC 61439-1&2, SIVACON S8 guarantees high performance, maximum safety and compact modularity.
