

Croatia Smart OTDR Intelligent Type

Article Overview

The Smart OTDR Intelligent Type is a handheld, multi-wavelength fiber tester with automated analysis, designed for efficient, accurate, and intelligent fiber network testing and management.

Overview and Key Features

The Smart OTDR Intelligent Type is a lightweight, compact OTDR that performs essential fiber tests for metro and access networks, suitable for technicians of all skill levels . It combines multi-wavelength testing (1310, 1490, 1550, 1625 nm) with advanced automation to optimize field testing, reduce errors, and speed up troubleshooting . Key features include:

- Smart Acquisition (SmartAcq): Fully automated multi-pulse acquisition that detects splices, connectors, and MUX/DEMUX elements, combining multiple traces into a single graph for easy analysis .
- Smart Link Mapper (SLM): Automatically identifies and labels all fiber elements, providing a clear pass/fail evaluation and guidance for fixing faults .
- Smart Test Assistant: Guides technicians through setup, testing, result review, and reporting, eliminating complex OTDR configuration .
- Single-Port Multi-Wavelength Testing: Supports construction, maintenance, and live network troubleshooting with a single tool .
- Real-Time Acquisition: Measures section loss, reflectance, and live traffic without impacting network operation .
- Ergonomic Touch Interface: Multi-touch gestures, swipe, pinch zoom, and scroll for intuitive control and results manipulation
