

Does the Xiaomi router connect directly to the fiber optic cable

Article Overview

Yes, a Xiaomi router can be used with fiber optic internet, but the fiber cable must first connect to an Optical Network Terminal (ONT), which then links to the router via Ethernet.

How It Works

Fiber optic cables transmit data as light signals, which standard routers cannot interpret directly. To bridge this gap, an Optical Network Terminal (ONT) is installed by your ISP. The ONT converts the optical signal into an electrical Ethernet signal that your Xiaomi router can use .

Xiaomi Router Compatibility

Models like the Xiaomi Router Be5000 are fully compatible with fiber internet. They feature a 2.5Gbps WAN port designed to handle high-speed fiber connections, supporting speeds beyond 1 Gbps without throttling or packet loss . This allows the router to maintain stable performance even under heavy network load and integrates seamlessly with the Xiaomi Mi Home ecosystem.

Step-by-Step Connection

- Install the ONT: Connect the fiber optic cable from the wall outlet to the ONT's optical port and power it on. Wait for the status lights to stabilize .
- Connect the ONT to the Router: Use a high-quality Ethernet cable (Cat6a or higher...
