

Efficiency of cable tray installation at construction sites

Overview

Industry studies show that properly implemented cable tray systems can reduce initial installation costs by up to 30% compared to traditional conduit methods, while simultaneously improving workplace safety and system reliability. Cable tray installation is often treated as a secondary activity on construction sites, but from real project execution experience, it is actually one of the. On construction sites, many people view cable trays as simple cable carriers. This perception often leads to cable overheating, tray sagging, or even rusting through later on.
