

Energy Anti-Calling Solution for Communication Sites in the Gulf Region

Article Overview

AI-powered voice fraud prevention platforms like Mavenir's CallShield, deployed by e& UAE, provide advanced anti-calling solutions for energy and utility communication networks in the Gulf.

Overview of Anti-Calling Solutions

Energy and utility operators in the Gulf region require secure and reliable communication networks to manage complex operations safely. Anti-calling solutions are designed to detect and block fraudulent, spam, and nuisance calls that can disrupt operations or compromise security. These solutions are particularly critical for oil, gas, and utility sites where communication reliability is essential for operational safety and efficiency .

AI-Powered Voice Security

Mavenir's CallShield platform, deployed in collaboration with e& UAE, uses AI and machine learning to monitor call patterns, caller ID authenticity, and call sentiment. It can detect anomalies in real time, including:

- Robocalls: Automated unwanted calls that can overload communication lines.
- Caller ID spoofing: Fraudulent calls that appear to come from trusted numbers.
- Wangiri scams: "One ring and cut" calls that trick recipients into returning premium-rate calls . The AI-driven system continuously updates and scales across the networ...
