

Ethiopia Galvanized Cable Tray Price

Article Overview

Galvanized cable trays in Ethiopia typically cost around \$0.80 per meter for large-scale industrial orders, with prices varying based on specifications and supplier.

Pricing Overview

For large industrial projects exceeding 10,000 meters, galvanized perforated trays can be priced as low as \$0.80 per meter when purchased in bulk. Smaller orders or custom specifications may increase the unit cost. Local distributors in Addis Ababa maintain limited stocks of common galvanized ladder trays, enabling faster delivery (7-10 days) but at slightly higher prices compared to bulk imports.

Factors Affecting Price

- **Material and Coating:** Hot-dip galvanized steel is standard for most inland industrial zones due to its cost-effectiveness and corrosion protection. Stainless steel variants cost 2-3 times more but are used in high-humidity or chemical environments.
- **Import Duties:** Electrical components, including cable trays, incur 15% import duty plus 15% VAT, adding roughly 30-35% to the FOB price.
- **Supplier Location:** Chinese manufacturers dominate the market, with standard lead times of 45-60 days (15-20 days production, 30 days shipping via Djibouti port). Local suppliers can provide urgent replacements faster.
- **Volume Discounts:** Bulk orders significantly reduce per-meter costs, making large-scale procurement more economical.
