

Fiber Optic 86-type AP Panel

Article Overview

The Fiber Optic AP Panel Type 86 is a standardized 86×86mm wall-mounted or patch panel solution designed for efficient fiber termination and secure FTTH deployment.

Overview and Design

The Type 86 fiber optic panel is built to standard 86×86mm dimensions, making it compatible with global wall boxes and mounting plates . It is available in single-port and dual-port configurations, with rounded corners and a front-and-back double panel design for a neat appearance and concealed fixing screws . Identification labels and covers are included to simplify maintenance and port management .

Fiber Termination and Cable Management

These panels accommodate SC adapters and support both simplex and duplex cable arrangements, including indoor soft cables and 3.0×2.0mm drop cables . The internal design ensures a large bend radius and multiple entry/exit ports, protecting fibers from micro-bending and mechanical stress, which helps maintain signal integrity . Flexible entry/exit options allow one or two cables to enter from different sides, enhancing installation versatility .

Installation Features

Type 86 panels are wall-mounted, space-saving, and designed for tool-free plug-in termination, which reduces labor time on-site . The mechanical fixation can withstand tension above 50N, ensuring reliable cable retention . The panels are suitable for bo...
