

Fiber Optic Wireless Router Setup

Article Overview

Setting up a fiber optic wireless router involves connecting the fiber cable to an ONT or router, linking it via Ethernet, and configuring the router's network settings for secure, high-speed internet.

Step 1: Prepare Your Equipment

Ensure you have the following:

- Fiber optic modem or ONT provided by your ISP
- Compatible router with a WAN or SFP port for fiber input
- Fiber optic cable (SC/APC or SC/UPC connectors)
- Ethernet cable to connect the ONT to the router
- Computer or mobile device to access the router's admin panel

Step 2: Connect the Fiber Optic Cable

- Locate the fiber wall outlet where the ISP's fiber line enters your home.
- Plug one end of the fiber optic cable into the wall outlet and the other into the ONT's designated port.
- Power on the ONT and wait 2-5 minutes for the status lights to stabilize .

Step 3: Connect the Router

- Use an Ethernet cable to connect the ONT's Ethernet/LAN port to the router's WAN port.
- Power on the router and wait for the indicator lights to confirm a successful connection
