

Frequency of Hidden Danger Inspections of Communication Towers

Overview

The ANSI/TIA 222 code calls for tower inspections to be completed at three-year intervals for guyed masts and five-year intervals for self-supporting structures and following severe weather or other extreme conditions. Pursuant to the OSH Act, employers must comply with safety and health standards and regulations issued and enforced either by OSHA or by an OSHA-approved state plan. Occupational safety agencies, such as OSHA in the United States, set the standards for worker safety, particularly. ANSI/ASSE A10. This standard establishes minimum criteria for safe work practices and training for personnel performing work on communication structures including. Analysis and design of Tower Inspections and TIA Condition Assessment Training courses, focusing on means and methods criteria for the construction, installation, alteration, and maintenance of communication structures.
