

Funding the construction of communication towers

Overview

Right-of-way grants authorize construction and operation of more than 4,000 facilities -- ranging from radio and television transmitters to cellular and wireless broadband towers -- under regulations (43 CFR 2800) and supporting policies. Improving emergency communications has been an area of congressional interest for many years. Before September 11, 2001, Congress provided funding through grants, which could be used to improve state and local emergency communications through purchases of police and fire radios, construction of. Communications towers are structures designed to hold communications equipment for wireless applications, including mobile telephony, television, radio and public safety communications networks. The towers are typically owned and operated by dedicated companies. These companies generate income. SAFECOM and the National Council of Statewide Interoperability Coordinators (NCSWIC), in collaboration with the Cybersecurity and Infrastructure Security Agency (CISA), updated the Funding Mechanisms Guide for Public Safety Communications to assist public safety agencies in identifying funding. In today's fast-paced digital world, effective communication is key to success in any industry.
