

Gigabit Ethernet Fiber Optic Connector

Article Overview

Gigabit Ethernet over fiber uses SFP modules with SC, LC, or ST connectors to transmit 1 Gbps data over multimode or single-mode fiber.

Overview of Gigabit Ethernet Fiber Standards

Gigabit Ethernet (GbE) supports transmission at 1 Gbps and can operate over fiber using the 1000BASE-X family, which includes:

- 1000BASE-SX: Short-range over multimode fiber, 850 nm wavelength, distances up to 550 m on OM2 fiber or 1 km on OM3/OM4 fiber, typically using SC or LC connectors .
- 1000BASE-LX: Long-range over single-mode fiber, 1310 nm wavelength, distances up to 10 km, also compatible with multimode fiber for shorter distances, using SC or LC connectors .
- 1000BASE-BX: Single-fiber bidirectional transmission using WDM, with separate wavelengths for upstream and downstream, distances from 10 km to 120 km, using SC or LC connectors .
- 1000BASE-ZX / EZX: Extended reach over single-mode fiber, 1550 nm wavelength, distances from 70 km to 120 km, using SC or LC connectors .

Fiber Connector Types

- SC (Subscriber Connector): Push-pull design, widely used in data centers and enterprise networks.
- LC (Lucent Connector): Smaller form factor, ideal for high-density installations....
