

Gigabit Ethernet Switches Industry

Overview

The Ethernet Switch Market Report is Segmented by Switch Type (Fixed Configuration Switches, and Modular Switches), Port Speed (1 GbE and Below, 2. 5/5 GbE, 10 GbE, and More), End User (Cloud and Data Center Providers, Enterprise (Commercial Offices and Campuses), and More) . Our Industrial Ethernet Switch portfolio comprises Managed and Unmanaged Switches with Gigabit, PoE, IEC 61850 certification, and for DIN rail mounting. This gives you the flexibility to build powerful and secure networks, even in harsh environments: copper and FO ports, as well as redundancy. Ethernet networks use transfer speeds that can be different depending on the requirements: Networks of 10 Mbps (megabits per second) are generally used for email and intranet networks. The equipment is wired on RJ45 sockets. Networks of 100 Mbps (called Fast Ethernet) are designed for small file.
