

Global fiber optic cable supply is tightening

Overview

Since 2026, the global optical fiber and cable market has fully entered a tight supply-demand state. The global demand for fibre optic cable continues to grow rapidly. It is driven by a combination of factors, but broadly speaking, it includes continuing fibre broadband rollouts, the expansion of 5G, and the building of more data centres needed to store and distribute the massive amounts of data. The fiber optic industry is experiencing an unprecedented supply crunch. " This is not a temporary fluctuation. After an extended period of subdued pricing in several regions, optical fibre prices are rising sharply alongside sustained demand. From a splicer's standpoint, ribbon cable is "much more user friendly and much more organized" because multiple fibers are bonded together.
