

How much do photovoltaic power generation modules cost

Article Overview

The cost of photovoltaic modules in 2026 ranges from approximately €0.06/Wp for low-cost modules to €0.145/Wp for high-efficiency or full-black modules, with typical residential modules costing €65–€81 per square meter depending on wattage.

Cost by Module Type

- High-efficiency modules: Around €0.130 per watt-peak (Wp), reflecting a 13% increase from early 2026 prices .
- Full black modules: Approximately €0.145/Wp, up 11.5% month-on-month .
- Mainstream modules: About €0.115/Wp, showing a 9.5% increase compared with the previous month .
- Low-cost modules: Around €0.060/Wp, slightly down compared with 2025 but up 9.1% from January 2026 .

Cost per Square Meter

Residential PV modules are often priced per square meter, with costs varying by wattage:

- 300 W modules: ~€81/m²
- 400 W modules: ~€74/m²
- 500 W modules: ~€65/m² Higher wattage modules require less area per kWp, which reduces the cost per square meter but may increase the price per module . For exa...
