

How much does a switch in a distribution box cost

Article Overview

Switches (circuit breakers) in a distribution box typically cost between \$10 and \$100 per unit, depending on type, amperage, and quality.

Overview of Switch Costs

The switches inside a distribution box, commonly referred to as circuit breakers, are essential for protecting circuits from overloads and short circuits. Their cost varies based on several factors:

- Type of breaker: Standard single-pole breakers for residential use are generally cheaper, while double-pole, high-amperage, or industrial-grade breakers cost more .
- Amperage rating: Breakers rated for 15-20A are common in homes and cost around \$10-\$25 each, whereas 50-100A breakers for larger circuits or industrial applications can range from \$50-\$100 or more .
- Brand and quality: Branded breakers with certifications (UL, CE) and higher durability tend to be more expensive than generic or unbranded units .
- Smart or advanced features: Breakers with integrated monitoring, remote control, or surge protection can significantly increase the price, sometimes doubling the cost compared to standard units .

Practical Considerations

- Residential setups: A typical home distribution box may contain 10-20 breakers, s...
