

How much does it cost per meter to install a perforated cable tray

Article Overview

The cost to install a perforated cable tray typically ranges from \$10 to \$50 per meter, depending on material, size, and installation complexity.

Material Costs

Perforated cable trays are generally less expensive than ladder trays but more protective than wire mesh trays. The material significantly affects the price:

- Steel trays: \$5–\$25 per meter, widely used for general-purpose installations indoors or in controlled environments .
- Aluminum trays: \$6–\$30 per meter, lightweight and corrosion-resistant, ideal for outdoor or humid environments .
- Fiberglass (FRP) trays: \$10–\$50 per meter, suitable for aggressive chemical or outdoor conditions .
- Stainless steel trays: Highest durability and corrosion resistance, used in high-demand or hygienic environments, typically at the upper end of the price range .

Installation Costs

Installation costs depend on several factors:

- Tray size and weight: Larger or heavier trays require more labor and stronger supports
