

How much does it cost to add a fiber optic cable and router to an enterprise

Article Overview

Installing fiber optic cable and an enterprise router typically costs between \$10,000 and \$30,000 for a medium to large commercial building, depending on building size, fiber type, and installation complexity.

Fiber Optic Cable Costs

The cost of fiber optic cable depends on the type, strand count, and installation method. Single-mode fiber is generally cheaper per foot than multimode fiber but requires more expensive equipment, while multimode fiber is more costly for longer runs . Material costs range from \$1 to \$6 per linear foot for retail purchases, with bulk wholesale prices as low as \$0.09 per foot . For commercial buildings with 100-200 network drops, total installation costs typically range from \$15,000 to \$30,000 . Installation method significantly affects cost: underground or trenching installations are more expensive than aerial or indoor runs, with median costs around \$18 per foot for underground and \$8 per foot for aerial deployments . Labor and installation usually account for 60-80% of total project costs, while materials make up 20-30% . Additional costs may include permits, site preparation, and testing.

Router and Networking Equipment Costs

For enterprise networks, a high-performance router capable of handling fiber connections and multiple users typically costs between \$500 and \$5,000, depending on throughput, security features, and redundancy options. Additional hardware suc...
