

How much does it cost to directly bury outdoor optical cables

Article Overview

Direct burial of outdoor fiber optic cables typically costs between \$6 and \$14 per linear foot, depending on cable type, terrain, and installation complexity.

Cost Breakdown

Cable Material: Armored fiber optic cables designed for direct burial generally cost \$6-\$14 per foot, with gel-filled cores and water-blocking protection to withstand underground conditions . The choice of armor, jacket thickness, and fiber type (single-mode vs multimode) can significantly affect the price . **Conduit (Optional):** While direct burial can be done without conduit, adding HDPE or PVC conduit costs an additional \$2-\$4 per foot and allows for future cable upgrades . **Labor and Trenching:** Excavation and trenching labor typically ranges from \$7-\$50 per foot, depending on soil conditions, terrain, and accessibility. Rocky soil or high water tables can double these costs . Trenching equipment rental may cost \$200-\$500 per day, while directional boring rigs can run \$800-\$1,500 per day but reduce surface restoration expenses . **Additional Costs:** Urban installations may require traffic control, certified flaggers, and safety measures, adding \$1-\$10 per foot. Handholes or access vaults cost \$200-\$800 each, and quality termination enclosures are needed to protect connections from moisture .

Total Project Estimates

For small residential or commercial runs, total costs can range from \$1,500 to \$7,0...
