

How much does pigtail fiber cost per meter normally

Article Overview

Fiber optic pigtails typically cost between \$0.50 and \$3.00 per meter, depending on fiber type, connector, and environmental specifications.

Fiber optic pigtails are short lengths of fiber with a factory-installed connector on one end, used for splicing into a fiber network. The price per meter varies based on several factors:

1. **Fiber Type:** Single-mode pigtails (OS1/OS2) are generally less expensive than multimode pigtails (OM3/OM4), which require higher-grade cores for short-reach, high-speed applications.
2. **Connector Type:** Common connectors include SC, LC, ST, and FC. Factory-terminated pigtails with high-precision connectors cost more than basic types.
3. **Environmental Rating:** Indoor pigtails with PVC or LSZH jackets are cheaper, while outdoor or armored pigtails designed for UV exposure, moisture, or direct burial can increase costs by 20–50%.
4. **Fiber Count and Length:** Single-core pigtails are cheaper than multi-strand pigtails. Longer lengths or custom specifications also raise the price.

Typical Price Range:

- Low-end: \$0.50–\$1.00 per meter for standard single-mode indoor pigtails
 - Mid-range: \$1.00–\$2.00 per meter for multimode or higher-quality connectors
 - High-end: \$2.00–\$3.00 per meter for armored, outdoor, or specialty pigtails
- For bulk purchases, prices may be lower, while small retail orders or pre-terminated assemblies can be at the higher end. Always check vendor specifications to ensure compatibility with your network requirements.
