

How to cut materials for reducing elbows in cable trays

Overview

Employ laser cutting machines or shearing tools to cut tray components. These machines ensure accuracy and minimize material waste. Double-check measurements against design blueprints to avoid errors. Inadequate cuts can lead to structural weaknesses, cable damage, or safety hazards. Klein Tools 63050 Cable Cutter, Made in USA, Heavy Duty Cutter for Aluminum, Copper, and. QUAXLENT. How to cut Oglaend System Support Channels, Cable Ladders and Cable Trays. Oglaend System manufacture and deliver Multidiscipline modular bolted support systems, cable trays, cable ladders and accessories for complete installation and containment of Instrument, Electrical, Telecom, HVAC and Piping. In the Oglaend System Cutting Guideline you can easily find out what the optimal cutting lengths/intervals are for all modular products. Following the advice given. Creating a 90-degree elbow in an electrical cable tray, often called a "fabricated" or "mitered" bend, involves cutting, bending, and fastening a straight section of tray.
