

How to fill in the list for a 144-core optical distribution box

Overview

Steps to Choose the Right ODF 144 Core: Determine the number of fiber connections required for your network. . PLEASE KEEP THIS GUIDE FOR FUTURE REFERENCE FIBER OPTIC CROSS CONNECTION CABINET 144, 288 AND 576 FIBER. Page 2 Fig 1 □ Put the fiber optic cable. When you open a splice closure on a 144-core ADSS (All-Dielectric Self-Supporting) cable, you are staring at 144 individual fibers. Without a systematic color coding scheme, identifying a single fiber among 144 would be a guessing game that wastes hours and risks costly mis-splices. The frame design is based on a 4U rack unit height. This 144C modular ODF is composed of 12pcs pre-loaded 12C splicing and patching unit that includes FC/SC/ST/duplex. 144Core modular optical fiber distribution frame is used where termination and connectivity of 144fibers (high density) is required.
