

# How to install the electrical distribution box at the bedroom door

## Article Overview

Install the distribution box in a dry, accessible location near the bedroom door, at about 1.5 meters height, with proper wiring, grounding, and circuit protection.

### Placement and Safety Considerations

- **Location:** Choose a dry, ventilated area near the bedroom door, away from flammable, corrosive, or explosive materials . Ensure the box is easily accessible for maintenance and emergency shut-off.
- **Height:** For residential installations, the recommended height is approximately 1.5 meters above the floor .
- **Clearance:** Maintain sufficient space around the box for ventilation and future upgrades. Avoid placing it directly above furniture or obstructed areas.
- **Protection:** Use a box with appropriate IP or NEMA rating for indoor use, typically NEMA 1 or IP20, to protect against dust and minor contact .

### Tools and Materials

- Screwdrivers, wire strippers, multimeter, insulation resistance tester, and mounting hardware .
- Distribution box, circuit breakers, terminal blocks, insulated wires, cable ties, and insulating tape .
- Personal protective equipment: insulating gloves, safety glasses, and slip-resistant shoes ....
