

How to use an optical cable winch

Overview

By several slings of the rope around the capstan head and a light pre-stress at the open end of the rope, the full pulling force can be used. Pulling speed and force can be altered by choice of capstan used. Advanced Tension Monitoring and Data Logging One of the most critical. When cable laying either in ducts or industrial buildings, KATIMEX® capstan winches offer a compact and powerful unit which is economical and hard wearing. pulling method & blowing method, which should be selected based on route length, site condition & accessibility of required equipment. → The range of trailer mounted cable pulling winches are used for the installation of LV, MV & HV power cables where high cable pulling tensions are required. In. Corning Optical Communications self-supporting (figure-8) optical fiber cable greatly simplifies the task of placing fiber optic cable on an aerial plant.
