

Huawei Ethernet Switch Optical

Overview

High-performance Huawei S5731-S48T4X switch with 48 Gigabit ports, 4 SFP+ slots, 336Gbps capacity, and robust surge protection. All-optical Ethernet switches are a type of switch that provides optical uplink and downlink ports, making them an ideal choice for building an all-optical campus network. They can function as core, aggregation, and access devices on campus networks and connect to upstream and downstream devices. Huawei's comprehensive portfolio of products and solutions enables you to realize smooth digital transformation and rapid growth of virtualization, Big Data, and cloud services. Huawei switches already help customers achieve success in industries such as finance, Internet, retail, education. Huawei CloudEngine 8800 series (CE8800) switches are 100G Ethernet switches designed for data centers and high-end campus networks. Based on Huawei's Versatile Routing Platform (VRP), CloudEngine S5736-S supports enhanced Layer 3 features, simplified Operations and Maintenance. When the altitude is 1800-5000 m (5906-16404 ft.), the highest operating temperature reduces by 1°C (1. 8°F) every time the altitude increases by 220 m (722 ft).
