

Hungarian Fiber Optic Distribution Box 4 Cores

Article Overview

A 4-core fiber optic distribution box is a compact, versatile enclosure designed for terminating, splicing, and distributing up to four fiber optic cables in FTTx networks.

Overview and Design

A 4-core fiber optic distribution box is typically wall-mounted or pole-mounted and serves as a multifunctional termination point for connecting feeder cables with drop cables in fiber-to-the-home (FTTH) or fiber-to-the-building (FTTB) networks . These boxes are made from durable ABS or reinforced materials, providing waterproof, dustproof, and anti-aging protection, making them suitable for both indoor and outdoor installations . Many models include flip-up distribution panels and cassette-type SC adapter slots, allowing for organized and easy access to fiber connections .

Key Features

- Capacity: Supports up to 4 fiber cores, with options for PLC splitters (1:2 or 1:4) for signal distribution .
- Cable Management: Separate paths for feeder cables, drop cables, pigtails, and patch cords prevent interference and simplify maintenance .
- Installation Flexibility: Compatible with wall-mounted or pole-mounted setups, and supports various cable diameters (e.g., 5-10 mm ports for indoor and outdoor FTTH cables), .
- Protection: Fully enclosed design ensures IP55 or higher protection, safeguarding...
