

Hungarian Telecom Optical Module Project

Overview

The Hungarian Telekom company has launched its nationwide 10-gigabit XGSPON optical network in a major development step. Residential customers can request four gigabit download speeds, and business clients get symmetrical eight-thousand megabits per second data transfer. 4iG International Digital Infrastructure Zrt. We believe a good team is the foundation of everything. Our people embody. The Hungarian telecommunications company 4iG is building a 2,800-kilometer optical fibre cable to connect Europe and Egypt under the sea, thus providing high-speed internet access, Minister of Foreign Affairs and Trade Péter Szijjártó announced in Cairo on Thursday. The cable will connect Egypt and Albania directly, to be extended from Albania. Telecom Egypt, the leading telecom operator in Egypt, and 4iG Group, a prominent Hungarian IT and telecommunications group, have signed a Memorandum of Understanding (MoU) to establish a joint venture (JV) focused on building a state-of-the-art fiber network.
