

Is the distribution box double-layered for rain protection

Overview

This distribution box, constructed from 304 stainless steel, features a double-layer door design offering both waterproof and corrosion protection, making it ideal for outdoor power monitoring and instrument installation. Key design points include high-quality materials like ABS plastic, aluminum, and stainless steel that resist corrosion and UV. Discover EKDB10 IP65 waterproof distribution boxes made of durable PC plastic. Available in 4-39 ways, single/double/triple layers, ideal for industrial, commercial, and photovoltaic applications. Meet IEC standards for reliable electrical protection. Check dimensions & specs now! EKDB10 series. This makes IP65 suitable for rain, wash-down areas, and exposed installations. Constructed from premium PC engineering plastics, these distribution boxes deliver exceptional mechanical. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices.
