

Latest Price and Specifications for Cable Trays in North Africa

Article Overview

Cable tray prices in North Africa typically range from \$15 to \$120 per 2.44-meter section, depending on material, type, and load capacity.

Overview of Cable Tray Types and Materials

Cable trays are essential for organizing and supporting electrical, communication, and data cables. The main materials used include galvanized steel, stainless steel, and aluminum, each offering different levels of corrosion resistance and durability (sources from Kenya and South Africa) . Common types include:

- Ladder trays: Ideal for heavy-duty industrial or commercial installations, providing maximum ventilation and support for large cables .
- Perforated trays: Offer moderate airflow while maintaining cable protection, suitable for commercial and light industrial use .
- Solid bottom trays: Provide enhanced protection for sensitive environments like data centers or control rooms .
- Wire mesh trays: Flexible and easy to access, commonly used in office spaces and commercial buildings .
