

List of Cable Tray Supports and Hangers

Article Overview

Cable tray supports and hangers include wall-mounted, ceiling-hung, floor-mounted, cantilever brackets, trapeze supports, stand-off brackets, G-hanger supports, and center supports, designed to ensure secure, organized, and safe cable management.

Main Types of Cable Tray Supports and Hangers

1. **Wall-Mounted Brackets** These brackets attach cable trays directly to walls, providing stable support for horizontal runs. They are ideal for installations along walls in commercial or industrial settings and can accommodate various tray widths and loads .
2. **Ceiling-Hung Supports** Suspended from ceilings, these supports allow cable trays to run overhead. They include G-hanger support brackets and trapeze support brackets, which can be pre-assembled for quick installation and are suitable for wide-span trays .
3. **Floor-Mounted Supports** Used when trays need to run along floors or raised platforms. These supports provide stability and prevent sagging, often used in data centers or industrial plants where overhead mounting is not feasible .
4. **Cantilever Brackets** Extend from walls or structural beams to support trays without additional vertical supports. They are useful for long tray runs or when space constraints prevent direct floor or ceiling mounting .
5. **Stand-Off Brackets** Designed to maintain a specific clearance from walls or surfaces, these brackets prevent interference with other installations and allow airflow around cables. Sizes typically range from 50mm to 300mm .
6. **Trapeze Support Brackets** Provide robust overhead support for multiple trays or wide trays. They are pre-assembled and available in various widths and drop lengths, ensuring quick and secure installation .
7. **Center Supports** Used for long tray spans to prevent sagging in the middle. They are available in zinc-plated steel or other durable materials and are sized according to t...
