

Lithuanian Cable Tray Production and Supply

Article Overview

Lithuania's cable tray production is primarily served by companies such as Voltum, Lietkabelis, and Kabelita, which manufacture and supply cable trays, ducts, and related electrical installation systems.

Key Manufacturers

Voltum is a Lithuanian company providing complete electrical installation services across Europe, including the supply and installation of tray and ladder systems, conduits, and cable pulling solutions. They operate with in-house teams and maintain their own transport fleet, enabling large-scale industrial and commercial projects, including cable tray installations up to 7 km in length . Lietkabelis, founded in 1958 in Panevezys, is one of Lithuania's oldest and most established cable producers. While originally focused on enamelled wires and low-voltage power cables, the company has expanded into automotive cable harnesses and industrial cabling solutions, and holds certifications such as ISO 9001 and BASEC for compliance with European standards . Lietkabelis is a significant player in the Lithuanian cable market and contributes to the production of cable trays and related electrical infrastructure. Kabelita, established in 1991, produces electricity cables and supplies HDPE technical pipes, which are often used in cable tray and duct systems. The company serves both wholesale and retail markets in Lithuania and abroad, providing materials for building and industrial projects .
