

Mozambique Trough-type Cable Tray Models

Article Overview

Trough-type cable trays for Mozambique can be sourced as CAD or BIM models in multiple formats, suitable for industrial and commercial electrical installations.

Overview of Trough-Type Cable Trays

Trough-type cable trays, also known as channel or solid-bottom trays, are designed to support and protect electrical cables while providing a rigid structure for routing power, control, instrumentation, and communication cables. They are particularly useful in environments where cables need full support and protection from mechanical damage or environmental exposure. These trays are typically made from aluminum, galvanized steel, or FRP, and comply with international standards such as IEC 61537 for cable tray systems .

Available CAD and BIM Models

Several platforms provide downloadable models for trough-type cable trays:

- TraceParts offers CAD files compatible with SolidWorks, Inventor, Creo, CATIA, AutoCAD, Revit, and neutral formats like STEP, STL, IGES, DWG, DXF. These models include straight sections, fittings, and accessories suitable for design integration .
- ABB T&B Cabletray provides a comprehensive catalog of aluminum and steel trays, including straight sections, ladder, ventilated, and trough types. CAD drawings are available in most popular formats and can be imported into Revit or other design so...
