

Names of Cable Tray Angle Iron Brackets

Article Overview

Cable tray angle iron brackets include vertical brackets, gantry brackets, stand-off brackets, G hanger supports, and trapeze support brackets.

Common Types of Angle Iron Brackets

- Vertical Angle Iron Brackets – Used for wall-mounted cable trays, providing stable vertical support and customizable dimensions for site-specific requirements .
- Gantry Angle Iron Brackets – Designed for overhead or horizontal support, often used in large installations to span multiple cable trays or support heavy loads .
- Stand-Off Brackets – These brackets create a clearance between the wall and the cable tray, available in various sizes (e.g., 50mm to 300mm) and made from pre-galvanized or hot-dipped galvanized steel .
- G Hanger Support Brackets – Overhead support brackets suitable for cable trays, trunking, or baskets, available in sizes like 100mm and 150mm, providing rigid and heavy-duty support .
- Trapeze Support Brackets – Pre-assembled brackets for quick installation, supporting cable trays at various widths and drop lengths, commonly used for suspended installations .
- Customized Angle Iron Brackets – Specially fabricated brackets tailored to specific site conditions, including variations for horizontal, vertical, or gantry applications .

Materials and Features

- Typically made from steel or stainless steel with galvanization for corrosion resistance .
- Available in equal-angle or unequal-angle profiles to suit different structural requir...
