

Nepal Instrument Cable Tray Specifications

Article Overview

Instrument cable trays in Nepal are available in ladder, perforated, and wire mesh types, with materials including GI, stainless steel, and aluminum, and dimensions customizable to project needs.

Types of Cable Trays

- Ladder Cable Trays: Ideal for heavy-duty instrument and power cables, providing excellent ventilation and support for long cable runs .
- Perforated Cable Trays: Feature perforations in the base and sides for better heat dissipation and cable management, suitable for electrical and data cables .
- Wire Mesh (Basket) Trays: Lightweight and flexible, used for complex routing and easy installation in commercial and industrial settings .

Materials and Finishes

- Galvanized Iron (GI): Pre-galvanized as per IS-277 or hot-dip galvanized as per IS-2629 for corrosion resistance .
- Stainless Steel (SS 202/304/316): Provides high durability and resistance to harsh environments .
- Aluminum: Lightweight, corrosion-resistant, and suitable for industrial and commercial applications .
- Finishes: Powder coated, painted, or hot-dip galvanized to enhance longevity and withstand Nepal's climatic conditions
