

North Asia Molded Cable Tray Price Inquiry

Article Overview

Molded cable tray prices in North Asia vary widely depending on material, size, load capacity, and supplier, typically ranging from \$10 to \$50 per meter for standard industrial options.

Price Overview

Molded cable trays, often made from fiberglass-reinforced plastic (FRP) or PVC, are priced based on material quality, thickness, and load-bearing capacity. In North Asia, suppliers offer both factory-direct and OEM options, which can influence cost significantly. Bulk orders or modular systems often come with volume discounts, making large-scale procurement more economical.

Factors Affecting Cost

- **Material Type:** FRP trays are generally more expensive than PVC but offer higher durability and corrosion resistance. Aluminum or galvanized steel alternatives may also be available for hybrid installations.
- **Customization:** OEM or tailored trays designed to specific dimensions or load requirements can increase the price, while standard sizes are more affordable.
- **Environmental Conditions:** Trays intended for outdoor or corrosive environments may require UV-resistant or chemical-resistant coatings, adding to the cost.
- **Supplier and Location:** Prices vary between manufacturers in China, Japan, and South Korea. Factory-direct suppliers often provide the most competitive rates, while distributors may include additional markups.
