

Oman fireproof cable trays are easy to install

Article Overview

Fireproof cable trays in Oman are available in materials like FRP/GRP, steel, and aluminum, and can be installed using ladder, tray, or wire mesh systems for industrial, commercial, and oil & gas applications.

Types of Fireproof Cable Trays

Fireproof cable trays are designed to protect electrical cables from fire hazards while providing mechanical support and ventilation. Common types include:

- Ladder-type trays: Prefabricated side rails connected by rungs, ideal for heavy cable loads and maximum ventilation, commonly used in oil & gas, power, and industrial projects .
- Solid-bottom trays: Provide full protection against fire and dust, suitable for sensitive installations.
- Wire mesh trays: Flexible and lightweight, suitable for data centers and commercial buildings .
- FRP/GRP trays: Fire-resistant composite materials offering corrosion resistance and high durability, ideal for harsh environments .

Materials and Fireproofing

Fireproof cable trays in Oman are typically made from:...
