

Optical Transmission Box Moved in Georgia

Overview

The Georgia Public Service Commission approved the expansion in December 2025, following a resource planning filing submitted in July 2025. It estimates 70-80% of the power on the new line will help serve data centers and the remaining 20-30% of power will serve the state's growing residential and commercial demand. Georgia Power, the Southern Company subsidiary that keeps the lights on for millions of Georgians, is now turning some of those lights off permanently. The utility is using eminent domain to seize properties along a 35-mile corridor, clearing the way for a massive transmission line designed to feed. Secretary of Commerce Gina Raimondo and Assistant Secretary of Commerce Alan Davidson traveled to OFS Fitel's headquarters in Norcross, GA, with U. Some residents could lose their land. Senator Reverend Raphael Warnock (D-GA) to celebrate the announcement of new jobs and increased domestic production of optical.
