

Order Upgrade Version of Off-Grid Relay Protection Power Supply System

Article Overview

You can upgrade your off-grid relay protection system by selecting modern protection relays, configuring them for your application, and leveraging retrofit programs from leading vendors like ABB, Siemens, and R&B Switchgear Group.

Modern Relay Options

ABB REX610: Designed to replace aging SPACOM relays, the REX610 supports all basic power distribution applications with only six variants, simplifying ordering and configuration. It allows adaptation throughout its lifetime to meet evolving protection, communication, and network requirements, and can be installed with minimal downtime due to matching cutout dimensions with legacy relays . **Siemens SIPROTEC 5:** Offers modular protection, automation, and monitoring for digital substations. The DIGSI 5 engineering tool allows tailored configuration, full control over relay settings, and integration with virtualized protection systems, making it suitable for off-grid or isolated power networks .

Ordering and Configuration

- **Select the Relay:** Use vendor online tools (e.g., ABB Relays-Online or Siemens DIGSI 5) to identify the relay model that fits your system requirements .
- **Configure Settings:** Define protection settings, including fault detection, breaker failure, and remote trip schemes, ensuring compliance with standards like IEEE and NERC .
- **Generate Ordering Code:** Online platforms allow you to create a product configura...
