

Price List of Fireproof Cable Trays in Congo

Article Overview

Fireproof or flame-retardant cable trays in Congo typically cost between \$15 and \$50 per meter, depending on material, type, and coating.

Price Overview

The cost of fireproof cable trays in Congo varies based on several factors:

- **Material:** Steel (galvanized or stainless) is common, while aluminum and fiber-reinforced plastic (FRP) are lighter and corrosion-resistant but more expensive .
- **Type:** Ladder-type trays are robust and suitable for heavy-duty applications, while perforated or wire mesh trays are lighter and cheaper .
- **Coating and Fireproofing:** Flame-retardant coatings, such as FM-approved intumescent latex, increase fire resistance and add to the cost . For example, hot-dip galvanized ladder-type trays with fireproof coatings are sold in standard lengths of 2.4 meters, and prices generally fall in the \$15-\$50 per meter range, depending on customization and supplier . FRP ladder or channel trays with covers for additional fire protection are also available, offering durability and corrosion resistance at a slightly higher cost .

Additional Cost Considerations

- **Installation:** Labor costs vary by region and complexity of the setup. Skilled installation for fireproof systems may increase total project costs
