

Price of Canadian Aluminum Cable Trays

Article Overview

Aluminum cable trays in Canada typically range from CAD 50 to CAD 200 per 3-meter section, depending on type, size, and load capacity.

Price Overview

The cost of aluminum cable trays in Canada varies based on tray type, dimensions, and manufacturer. Common types include ladder, solid-bottom, ventilated, and wire mesh trays. For example:

- Lightweight modular trays like Snake Tray are designed for low-voltage or telecom applications and are generally on the lower end of the price spectrum due to smaller load capacity and simpler construction .
- Heavy-duty industrial trays such as Chalfant aluminum trays offer higher static load performance, longer spans, and corrosion resistance, making them more expensive but cost-efficient for long-term use .
- Standard ladder or channel trays from suppliers like WESCO Canada or Unitray typically cost CAD 50-200 per 3-meter section, depending on width (4-24 inches), height (4-6 inches), and load rating (60-80 lb/ft), .

Factors Affecting Cost

- Material and Alloy: Most Canadian aluminum trays use 6063-T6 aluminum, which balances strength and corrosion resistance .
- Tray Dimensions: Wider or taller trays with higher load ratings cost more. For example, a 6-inch high, 12-inch wide ladder tray rated for 80 lb/ft is more expensive than a 4-inch by 6-inch tray rated for 60 lb/ft
