

Price of Egyptian Metal Cable Trays

Article Overview

Metal cable trays in Egypt typically range from approximately 250 EGP to 1,200 EGP per meter, depending on material, type, and specifications.

Overview of Pricing

The cost of metal cable trays in Egypt varies widely based on several factors:

- **Material:** Galvanized steel, stainless steel, aluminum, and PVC-coated trays are available. Stainless steel and aluminum trays are generally more expensive than galvanized steel due to corrosion resistance and durability .
- **Type and Design:** Perforated trays, solid-bottom trays, cable ladders, and wire mesh trays differ in price. Perforated trays are lighter and easier to install, while solid trays provide more protection but cost more .
- **Dimensions and Thickness:** Tray width, side height, and sheet thickness (typically 0.8 mm to 3 mm) significantly affect the price. Thicker trays designed for heavy-duty applications are more expensive .
- **Finishes and Coatings:** Hot-dip galvanization, pre-galvanization, and electrostatic painting add to the cost, especially for outdoor or corrosive environments .
- **Accessories:** Covers, connectors, bends, risers, and junctions are additional costs that can increase the overall system price .

Typical Price Range
