

Price of Molded Composite Cable Trays

Article Overview

Molded composite cable trays typically range from \$0.80 to over \$76 per unit, depending on size, type, and purchase volume.

Pricing Overview

Molded composite cable trays, often made from fiberglass-reinforced polymers, are valued for their lightweight, corrosion-resistant, and durable properties. Prices vary significantly based on tray dimensions, load capacity, environmental resistance, and whether purchased in bulk or retail. For B2B purchases, especially through platforms like Alibaba, prices can start as low as \$0.80 per unit for smaller or standard trays, while larger or specialized trays can exceed \$76 per unit. B2C options, such as those on Amazon, are generally higher per unit, ranging from \$15 to \$34, reflecting smaller quantities and consumer-focused packaging.

Factors Affecting Price

- **Material and Durability:** Composite trays resist moisture, chemicals, UV exposure, and temperature extremes, which can increase cost compared to basic metal or wire mesh trays.
- **Tray Type:** Ladder-style, channel, or fully enclosed trays differ in complexity and protection level, influencing price.
- **Volume and Bulk Discounts:** Purchasing directly from manufacturers or wholesalers often reduces per-unit cost, especially for large-scale industrial projects.
- **Customization:** OEM or tailored trays designed for specific load capacities or environmental conditions may cost more but ensure compliance with project requirements.
